

THE SAVIOUR.

Textbooks in a jiffy

What is the project about?

- Basically just displaying books (and probably some other stuff), but in a fun and intuitive way. Simple, right?

Who will this help?

- Anyone—from an engineering student to frequent fiction readers and enthusiasts.

How are we going to implement it?

- That's the fun part. Using A-frame for a web virtual reality (Web VR) experience.
